

Growing success from the ground up

Cargill RegenConnect™

Cargill is helping connect farmers with emerging carbon markets, making it possible for profitability and positive environmental impacts to go hand in hand. Work with a trusted partner that is committed to helping you improve soil health while earning payments for carbon sequestration.

We believe agriculture is how we can create better environmental and economic outcomes. Prepare for the future of farming that strengthens your soil, your crops, and your bottom line.

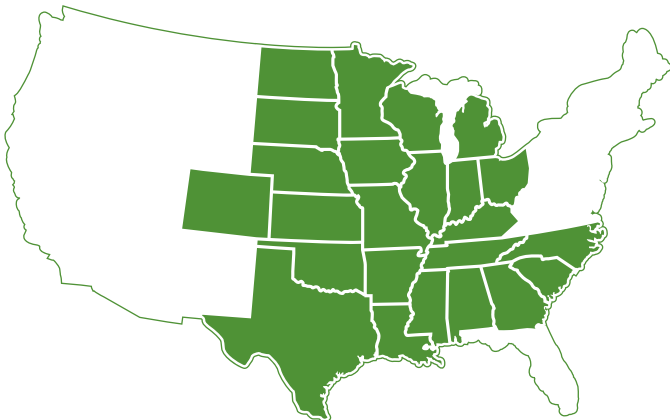

Making it easier to embrace change:

How it works

Practices such as cover crops and reduced tillage increase crop productivity and land resilience, enhance soil organic matter, reduce erosion, and improve water quality and availability.

Eligible locations:

To enroll:

1. Enroll between March and September 15, 2023.
2. Select fields to quantify carbon outcomes and estimate the impact of the practices you choose.
3. Receive a minimum guaranteed payment in February 2024 and the balance after verification is complete in January 2025.
